WHAT IS GREEN?

WRITTEN BY: CHADAI JAMESON

The Growing Roots East End Network (GREEN) aims to bring together local schools and organizations for the purpose of helping sustain, promote and connect gardens across the school feeder program. As a result, we hope to see an increase on access to healthy foods, improved nutrition education, greater social cohesion, and economic opportunities for low-income families.

Meet our intern

We are pleased to announce that we have a new intern that is helping out with the GREEN Collaborative this spring, Chadai Jameson. Chadai is a senior kinesiology and nutrition student at the University of Houston. Not only is she an intern with us, but she is apart of the BOUNCE program. In the program she is responsible for the Master Growers Program, which focuses on gardening at Burnet Elementary . She will serve as a liaison for the PEACE club at Milby High School and will help with creating our newsletters.
